HUB

Anna Gräbner

CEO, Genolier Innovation Hub

Anna Gräbner is the CEO of the Genolier Innovation Hub, a 25,000 m² platform dedicated to health innovation at the heart of Switzerland's Health Valley. By bringing together medtech, biotech, pharma, digital health and academic stakeholders, the Hub acts as a bridge between research and clinical practice, accelerating the development of solutions with real impact for patients.

With a background spanning hospitality management, business and healthcare, Anna Gräbner has built a unique career at the crossroads of science, innovation and social engagement. She co-founded *Eyecap*', a startup developing a connected swimming cap for the visually impaired, reflecting her commitment to inclusive, user-oriented technologies.

In addition to her leadership role, she is a regular speaker at healthcare and innovation forums, where she advocates for collaborative, cross-sectoral approaches to transform health systems. She has contributed to panels and symposiums on digital health, medtech translation and the future of patient-centered care, positioning her as a recognized voice in shaping tomorrow's healthcare.

Known for her engaged and interdisciplinary leadership, Anna Gräbner promotes an open and impact-driven approach to innovation. Under her guidance, the Genolier Innovation Hub is becoming an international ecosystem where researchers, clinicians and companies work side by side to advance translational research and respond to global health challenges.
